Summary

Hello! I'm Rahul R, a passionate Software Developer with 4 years of experience proficient in creating efficient, scalable software solutions. I specialize in **Node.js, React.js and Next.js**, with a proven track record of integrating complex third-party APIs and managing diverse database systems.

Skills

Backend Development

Node.js, Adonis.js, Express.js, NestJS

Frontend Development

Next.js, React.js, TypeScript, JavaScript, HTML5, CSS3

Database Management

PostgreSQL, MySQL, MongoDB

API & Integration

RESTful APIs, OpenAI (ChatGPT) Integration, FedEx/DHL/Aramex/SMSA APIs, RazorPay, Stripe, Flywire, Socket.io

ORMs & Data Modeling

Lucid ORM, Sequelize (ORM), Mongoose (ODM)

API Documentation & Testing

Swagger, Postman, Apidog, RESTful APIs

Experience

Syntrio Technologies

Software Developer

Thiruvananthapuram, Kerala

Jan, 2024 - March, 2026

- Develop and maintain scalable web applications using **Node.js, React.js, and Adonis.js**.
- Integrated global logistics APIs (FedEx, DHL, Aramex, SMSA) for real-time shipment management.
- Optimized database queries and indexing using **MySQL** to ensure maintainable, high-performance code

<https://syntrio.in/>

Spericorn Technology

Jr. Software Developer

Thiruvananthapuram, Kerala

July, 2022 - Oct, 2023

- Collaborated on web application maintenance and development using **Express.js and PostgreSQL**.
- Participated in rigorous code reviews and debugging to optimize system performance.
- Utilized **Jira** for efficient project planning and task tracking within a team environment.

Logiprompt Techno Solutions

Software Trainee

Thiruvananthapuram, Kerala

Oct, 2021 – July, 2022

- Contributed to the planning, designing, creating, and testing phases of project development.
- Wrote efficient, clean code to ensure optimal performance and scalability for web applications.
- Developed a **Waste Management System** as a key project during this tenure.
- **Tech Stack:** Node.js, React.js, Ionic, HTML, CSS, Bootstrap, JavaScript, TypeScript, Git, and MongoDB.

Education

Indira Gandhi National Open University(IGNOU)

Computer Application

Master Of Computer Application(MCA)

Thiruvananthapuram, Kerala • July, 2022 - July, 2024

University of Kerala

Computer Application

Bachelor of Computer Application(BCA)

Kollam, Kerala • July, 2018 - July, 2021

Projects

Delybell (Delivery Management Application)

- Built a comprehensive logistics portal handling both user-facing and administrative operations.
- Integrated multiple global shipping APIs, including **FedEx, DHL, Aramex, and SMSA**, to automate label generation, tracking, and rate calculation.
- **Tech Stack:** Next.js, AdonisJS (Node.js), TypeScript, MySQL, Lucid ORM.

ProfileUP (Professional Networking & Hiring Platform)

- Developed a professional networking and profile-building application featuring a full Hiring Management System.
- Implemented **Kanban Board** functionality for tracking recruitment stages and candidate progress.
- Integrated **ChatGPT (OpenAI)** API for automated **Question Paper Generation** and interview assessments.
- Managed complex payment workflows using **RazorPay** and integrated **Zoho Projects** for task management.
- **Tech Stack:** Next.js, AdonisJS (Node.js), MySQL, Lucid ORM, OpenAI API, RazorPay.

PlanGenie (Budget Management Application)

- Developed an NDIS-based budget management web app for overseeing government-funded disability support plans.
- Focused on precise financial tracking and plan management using a robust backend architecture.
- **Tech Stack:** React.js, AdonisJS (Node.js), TypeScript, MySQL, Lucid ORM.

Two Stay (Accommodation Booking System)

- Engineered an online platform for overseas accommodation and transportation booking with automated invoicing.
- Created multi-level modules for admins, clients, and accommodation providers to manage availability and searches.
- **Tech Stack:** Node.js, PostgreSQL, Sequelize (ORM), Jira, ClickUp.

CBill (Kerala Vision Billing Application)

- Successfully migrated a legacy .NET-based billing system to a modern, high-performance web architecture.
- **Tech Stack:** Next.js, TypeScript, Git.

MedBridge (Doctor Appointment Application)

- Developed a real-time doctor appointment web application with integrated payment processing.
- **Tech Stack:** Next.js, Socket.io, RazorPay, Open Project.

Flood Management System (Academic)

Designed a disaster response and tracking system for the Master of Computer Applications (MCA) capstone project.

ERP – ClickUp

- Designed an Enterprise Resource Planning web application with advanced project management and task tracking features.
- **Tech Stack:** Node.js, MongoDB, Mongoose (ODM), Git.

Student Management System

Tech Stack: Node.js, EJS, MongoDB, Mongoose (ODM).

Waste Management System

Tech Stack: React.js, Node.js, MongoDB, JavaScript, TypeScript.
